## About Us

Yasin Company was established with the aim of providing high-quality products in the field of health and hygiene. Our main product is hospital gowns, which are manufactured using high-quality raw materials and in compliance with global standards. At Yasin Company, we are committed to values such as authenticity, honesty, and dedication to delivering the best services to our customers. Our team consists of experienced specialists and experts who continuously improve our products and production processes with their knowledge and expertise.

## **Types of Hospital Gowns**

### **1- Surgical Gown**

Surgical gowns, also known as operating room garments, play a crucial role in maintaining hygiene and preventing infection transmission. These gowns are used not only in operating rooms but also in veterinary clinics and laboratories to ensure the safety of medical staff and prevent the spread of infectious agents.

### **2- Patient Gown**

Yasin Company ensures that the needs of medical and healthcare staff are met in the best possible way by producing high-quality gowns and scrubs made from disinfectable materials. These garments not only provide comfort and functionality but also contribute significantly to the safety and hygiene of healthcare workers.

### 3- **Dental Gown**

A disposable gown worn by dentists and oral surgeons during examinations, treatments, and dental surgeries. This gown provides a physical barrier to prevent the transmission of germs and contaminants between patients and dentists. It also protects the dentist's personal clothing from contamination and chemical exposure. Wearing a gown can give the patient a sense of reassurance and comfort. Dental gowns are commonly made of spunbond fabric, and the color choice depends on the dentist's preference and clinic decor.

### 4- **Classic Patient Robe**

One of the most common hospital garments, designed for patient comfort. These robes are specifically tailored so that patients can easily wear and remove them without assistance. They often feature ties or fasteners at the back to ensure a secure fit and prevent unwanted movement.

## 5- Isolation Gown

Isolation gowns provide additional protection in situations requiring a high level of safety, such as handling blood containing viruses like hepatitis or HIV. These gowns are made of waterproof materials such as plastic or spunlace fabric, repelling liquids and worn over scrubs or other clothing.

## 6- Laboratory Gown

A protective covering designed for use in laboratory environments to shield the wearer from chemical and biological substances. These gowns are made from durable materials and designed to allow unrestricted movement. Some are washable, while others are disposable. With long sleeves and closed collars, they offer full-body protection.

## 7- Disposable Gown

A protective garment designed for single-use in laboratories and hospitals. These gowns are made from lightweight, fluid-resistant, and contamination-resistant materials, making them easy to wear and dispose of after use.

## 8- Surgical or Accordion Hospital Cap

An accordion-style cap is a medical accessory used to maintain hygiene in surgical and healthcare environments. It fully covers the hair, preventing hair shedding, which helps reduce the risk of infection.

## 9- Disposable Hospital Bed Sheet

A disposable hospital bed sheet is an essential hygienic tool used to prevent hospital mattresses from being contaminated with blood and other fluids. These sheets help maintain personal hygiene for patients and prevent the spread of contagious diseases among individuals.

## **10- Disposable Bed Roll**

A disposable bed roll prevents medication spills and stains. These sheets have multiple applications in maintaining patient health and hygiene in medical centers and hospitals.

## **11- Disposable Sleeve Cover**

A disposable sleeve cover is a hygienic and practical product used in various environments such as hospitals, hotels, medical centers, and restaurants. These covers are made of spun-bond fabric and are designed to prevent contamination and moisture from reaching your clothing, keeping it clean and sanitary during work.

## Final Words

We are committed to environmental sustainability and the optimal use of natural resources. We strive to minimize our environmental impact at every stage of production and distribution. Our goal is to establish close and effective relationships with our customers and offer products that best meet their needs. Join Yasin Trading Company and experience exceptional quality and service through our products.
